

# Finding Characters

-  **Swipe Left**  
Shift the alphabet left of the current character.
-  **Swipe Right**  
Shift the alphabet right of the current character.
-  **Swipe Down\***  
Reset the position of the alphabet back to center.
-  **Touch and Hold**  
Uppercase the current character.
-  **Two Finger Swipe Right**  
Change alphabets (lowercase, uppercase, emoji, numeric).
-  **Three Finger Swipe Right**  
Change to next iOS keyboard (VoiceOver only).

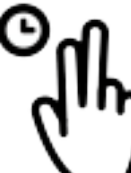

\* The first swipe down gesture resets the position of the alphabet to the center (i.e. 'm'). If it is (or already was) reset, subsequent swipe down gestures will backspace characters in the text field.

# Inserting or Deletion

-  **Swipe Up**  
Insert the current character into the text field.
-  **Double Tap**  
Insert a space into the text field.
-  **Swipe Down\***  
Backspace a character in the text field.

# Repeating Announcements

-  **Two Finger Tap**  
Announce the current character.
-  **Two Finger Hold**  
Announce the current word.

# Other

-  **Pinch**  
Close the VInput keyboard.
